Forecast for Saturday 04 Jun 2022

Weather: A damp start with early showers ahead of a drier interval in the early hours. This drier interval will be short lived before further showers sweep across the park in the morning, which could be heavy and thundery at times. The showers easing through the afternoon to allow for some drier and increasingly bright periods. Staying largely dry into the evening with some clear spells.

Chance of cloud-free hill tops above 600m: 60% until after dawn, becoming >90%.

Low cloud and visibility: Broken cloud above 400-600 metres likely across eastern hills through the early morning, lifting and breaking soon after sunrise. Very poor visibility in the heavy showers of the morning, with cloud occasionally falling to 600m. Generally very good visibility from the afternoon with cloud above the hills.

Forecast for Sunday 05 Jun 2022

Weather: Cloud soon covering the park as a band of rain and showers arrives in the early morning. The precipitation could be heavy and perhaps with some thunder. A drier but still cloudy interval around late morning before a second pulse of rain arrives for the afternoon and evening.

Maximum wind: 20mph easterly winds on the summits, easing to 10mph for the evening.

Chance of cloud-free hill tops above 600m: 30% for much of the day.

Low cloud and visibility: Cloud quickly lowering to 500m in the morning, shrouding many higher routes. Visibility becoming very poor in any heavy rain and showers that pass over through the morning and then again in association with the second band of rain.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 16 Celsius.
At 600m: Plus 5 Celsius, rising to plus 8 Celsius.
Freezing level: Above the summits.
